

MAIN-MEETING | FRIDAY, 13 SEPTEMBER 2019

08:30 - 09:30	ORAL POSTER SESSIONS (2 minutes presentations)	Poster Cabinets 3rd Floor
	LACRIMAL – Moderator: C. Miller, I. Ntountas	Poster Cabinet I
PL01	Concha bullosa reduction with mini invasive technique in candidates for dacryocystorhinostomy	S. Budiman
PL02	Pediatric nasolacrimal duct obstruction: comparison of external and endonasal DCR techniques	O. Konuk
PL03	Long-term outcome of transcanalicular microendoscopic lacrimal duct surgery at a tertiary eye center in Germany	N. Mihailovic
PL04	Endoscopic DCR in functional epiphora	M. J. Couce Meradi
PL05	No impact of nasal septoplasty on the outcome of endoscopic dacryocystorhinostomy	A. Priel
PL06	Triamcinolone use in dacryocystorhinostomy. A four year audit in a tertiary referral center in the United Kingdom	E. Lokovitis
PL07	Evaluation of the effectiveness of balloon catheter dilation as a treatment of congenital nasolacrimal duct obstruction	H. González Valdivia
PL08	Hasner's valve reconstructive surgery efficacy in patients with secondary nasolacrimal duct obstruction following radioiodine therapy	V. Yartsev
PL09	Antibiotic prophylaxis and the rate of surgical site infection (SSI) in clean and clean-contaminated oculoplastic, lacrimal and orbital surgery	P. Shams
	AESTHETICS - Moderator: D. Ezra, R. De Keizer	Poster Cabinet II
PA01	Dermatochalasis through decades. A histopathologic study	M. Kashkouli
PA02	Long-time effect of eyebrow tattooing on skin thickness in upper lid blepharoplasty	M. Jamshidian Tehrani
PA05	Ocular complications following dermal filler treatment; pathogenesis and treatment guidelines	F. Hageman
PA06	Cosmetic foam sclerotherapy and rare ophthalmic complications	A. Sawhney
PA07	Lower blepharoplasty complications correction. Compromise approach	A. Kim
PA09	Pressure ulcer following circumferential head dressing; small case series and review of literature	M. Kashkouli
	EYELID - Moderator: D. Georgescu, A. Garip Kübler	Poster Cabinet III
PLM01	Safety, functional and cosmetic outcomes of congenital ptosis surgery in children	A. Jakubaszek
PLM02	Comparison of upper eyelid contour symmetry in patients with congenital blepharoptosis who underwent frontalis muscle flap surgery using Bézier curves	I. Pereira
PLM04	Acute idiopathic tarsal ectropion in young- case series	M. Pauly
PLM06	A comparison of the lateral tarsal strip with everting sutures and the Quickert procedure for involutional entropion	S. Dulz
PLM07	Cicatricial and tarsal ectropion: repair by myocutaneous flap and canthopexy	G. L. Mora Botia
PLM08	Long-term management of orbital and periorbital plexiform neurofibromas in patients with neurofibromatosis type 1	A. Fakin
PLM09	Is there a role for hyaluronic acid fillers in the management of congenital ectropion?	A. Altenburg

	ORBIT I - Moderator: D. Hartong, D. Paridaens	Poster Cabinet IV
PO01	The London experience of patients across three multi-disciplinary Graves' orbitopathy clinics	S. Farag
PO03	A volumetric analysis of spontaneous decompression in thyroid eye disease and compressive optic neuropathy	T. Nanda
PO04	The degree of changes in eyelid index parameter after endonasal and transcaruncular orbital decompression in thyroid associated orbitopathy	S. M. Kang
PO05	Demographic and clinical profile of 1000 patients with thyroid eye disease presenting to a tertiary eye care institute in India	V. Vasanthapuram
PO06	Granulomatous inflammation following intraorbital stem cells injection	V. Sheptulin
PO07	Single cell proteomics of regulatory T cells and IgG4 plasma cells in Immunoglobulin G4 related orbital disease (IgG4-ROD)	S. Shen
PO08	Carotid cavernous fistula. Treatment with embolization via the superior ophthalmic vein	I. Ntountas
PO09	Orbital trauma in a regional orbito-facial Trauma Centre	A. Alnahrawy
09:35 - 09:40	WELCOME AND OPENING – H. Sigurdsson	Plenary Hall/2nd Floor
09:40 - 10:45	EYELID SESSION I – Chair: H. Sigurdsson, S. Sahlin	Plenary Hall/2nd Floor
09:40 - 09:46	Primary eyelid basal cell carcinoma: a multicenter retrospective study	G. Volpe
09:46 - 09:52	The efficacy of propranolol in eyelid capillary hemangiomas	S. Dogan
09:52 - 09:58	Eyelid reconstruction with rhomboid flap: a case series	R. Vieira
09:58 - 10:04	Dermal matrix grafts in eyelid reconstruction following Mohs surgery	P. Custer
10:04 - 10:10	Assessing oral mucosal grafting: complications and postoperative outcomes in a broad collective of patients	D. Pilger
10:10 - 10:16	En bloc lateral wedge resection for involutional entropion: A simplified technique	A. Aziz
10:16 - 10:22	The second secon	O. Zloto
10:22 - 10:28	AS-OCT guided treatment of diffuse conjunctival squamous cell carcinoma with resection, amniotic membrane graft and topical mitomycin C	T. Elhamaky
10:28 - 10:45	Time for Questions & Discussions	
10:45 - 11:05	KEYNOTE LECTURE I – Murat Dogru, Japan Eyelid surgery and the ocular surface Part II: Changes in tear film and ocular surface following lid surgery Introduction by U. Schaudig	Plenary Hall/2nd Floor
11:05 - 11:35	Coffee break & Time for Video Presentations and Digital Posters	Ground Floor/1st Floor Library on 1st Floor
11:35 - 12:40	EYELID SESSION II – Chair: F. M. Quaranta-Leoni, C. Jones	Plenary Hall/2nd Floor
11:35 - 11:41	Palpebral temporal sling procedure for the correction of paralytic ectropion	G. Castela
11:41 - 11:47	Müller muscle conjunctiva resection for revision of residual ptosis after external levator advancement surgery	G. Ozturk Karabulut
11:47 - 11:53	The effect of ptosis repair versus upper blepharoplasty on upper and lower eyelid position	O. Zloto
11:53 - 11:59	Effect of upper eyelid blepharoplasty on the ocular surface and the tear film	Y. Ozkan Arat
11:59 - 12:05	The effect of diabetes mellitus on eyelid aperture	F. Naqadan
12:05 - 12:11	Can upper lid everting surgery improve dry eye symptoms in patients with Meibomian gland inversion not responding to treatment?	E. Samia-Aly
12:11 - 12:17	Endoscopic corneal neurotization with ipsilateral versus contralateral supraorbital nerve transfer	D. Georgescu
12:17 - 12:23	Comparison of open and closed methods of Fox pentagon silicone rod tarso-frontalis suspension surgery for congenital lid ptosis	A. R. Pant
12:23 - 12:40	Time for Questions & Discussions	

13:00 – 14:00 13:00 – 14:00 13:00 – 14:00 13:00 – 14:00 13:00 – 14:00 13:00 – 13:10 13:01 – 13:25 13:01 – 13:25 13:02 – 13:35 13:03 – 13:45 13:03 – 13:45 13:03 – 13:45 13:04 – 13:25 13:05 – 13:35 13:05 – 13:35 13:05 – 13:35 13:05 – 13:35 13:05 – 13:35 13:06 – 13:35 13:06 – 13:35 13:07 – 13:35 13:07 – 13:35 13:08 – 13:35 13:09 – 13:35 13:09 – 13:35 13:09 – 13:35 13:09 – 13:35 13:09 – 13:35 13:09 – 13:35 13:09 – 13:35 13:09 – 13:35 13:09 – 13:35 13:09 – 13:35 13:09 – 13:35 14:00 – 15:05 14:00 – 15:05 14:00 – 15:05 14:00 – 15:05 14:00 – 15:05 14:00 – 15:05 14:00 – 15:05 14:00 – 14:12 15:00 – 16:10 16:00 – 16:20 16:00	12:40 - 13:00	KEYNOTE LECTURE II – Gerd Geerling, Germany Eyelid surgery and the ocular surface Part III: Eyelid surgery and corneal disease Introduction by M. Beaconsfield	Plenary Hall/2nd Floor
13:00 – 13:10 Brief Introductions C. Eenhorst 13:10 – 13:25 What I have learnt about the management of Thyroid Eye Disease 13:25 – 13:35 How I manage difficult patients 13:35 – 13:45 What YASOPRS is and does – its raison d'etre and how this can translate to the European setting 13:45 – 13:55 Discussion and Introduction of next YESOPRS leader 14:00 – 13:05 ORBIT I - SESSION – Chair: D. Strianese, G. Rose 14:00 – 14:06 The effect of prostaglandin analogue bimatoprost on thyroid associated orbitopathy 14:06 – 14:12 Indications, outcomes, complications and trends in 500 consecutive decompression surgeries by a single surgeon 14:12 – 14:18 Orbital exenteration versus surgical excision in patients with periocular squamous cell carcinoma. A survival analysis study 14:18 – 14:24 Does optic nerve stretch cause dysthyroid optic neuropathy? 14:24 – 14:30 Visual field and orbital computed tomography correlation in compressive optic neuropathy due to thyroid eye disease 14:30 – 14:42 Vertical restrictive strabismus: similar clinical signs, different etiopathogenetic causes 14:42 – 14:48 Real-world use of non-echoplanar diffusion-weighted magnetic resonance imaging for detection, disease monitoring and clinical decision-making in graves' orbitopathy 14:48 – 14:50 Time for Questions & Discussions 15:05 – 15:25 KEYNOTE LECTURE III – Richard C. Allen, United States Eyelid dynamics: Paying attention to movement, rather than position Introduction by E. Dafgård Kopp 15:25 – 16:50 AESTHETIC – SESSION – Chair: F. Bernardini, G. Charonis 15:50 – 16:50 Small incision lower blepharoplasty 5. Elwan 15:56 – 16:02 Surpical management of superior sulcus hollowing using autologous fat flaps or grafts 16:02 – 16:08 Volume augmentation upper eyeld blepharoplasty, a better look 16:08 – 16:14 – 16:20 Open-incisional double eyelid plasty with CO2-laser 16:26 – 16:32 Open-incisional double eyelid plasty with CO2-laser 16:32 – 16:50 Time for Questions & Discussions	13:00 - 14:00		
13:10 – 13:25	13:00 - 14:00	YESOPRS MEETING – Chair: C. Eenhorst, J. Roos	Plenary Hall/2nd Floor
13:25 – 13:35 How I manage difficult patients 13:35 – 13:45 What YASOPRS is and does – it's raison d'etre and how this can translate to the European setting 13:45 – 13:55 Discussion and Introduction of next YESOPRS leader 14:00 – 15:05 ORBIT I – SESSION – Chair: D. Strianese, G. Rose 14:00 – 14:00 The effect of prostaglandin analogue bimatoprost on thyroid associated orbitopathy 14:06 – 14:12 Indications, outcomes, complications and trends in 500 consecutive decompression surgeries by a single surgeon 14:12 – 14:18 Indications, outcomes, complications and trends in 500 consecutive decompression surgeries by a single surgeon 14:12 – 14:18 Orbital exenteration versus surgical existion in patients with periocular squamous cell carcinoma. A survival analysis study 14:18 – 14:24 Does optic nerve stretch cause dysthyroid optic neuropathy? 14:24 – 14:30 Zirconium-89 labelled ritusimab PET-CT in orbital inflammatory disease 14:30 – 14:36 Visual field and orbital computed tomography correlation in compressive optic neuropathy due to thyroid eye disease 14:36 – 14:42 Vertical restrictive strabismus: similar clinical signs, different etiopathogenetic causes 14:42 – 14:48 Real-world use of non-echoplanar diffusion-weighted magnetic resonance imaging for detection, disease monitoring and clinical decision-making in graves' orbitopathy 14:48 – 14:54 The result of intraconal and extraconal fatty decompression 15:55 – 15:55 Time for Questions & Discussions 15:05 – 15:25 EXPOTE LECTURE III – Richard C. Allen, United States Eyell dynamics: Paying attention to movement, rather than position Introduction by E. Defgàrd Kopp 15:25 – 15:50 Coffee break & Time for Video Presentations and Digital Posters 15:50 – 16:50 AESTHETIC – SESSION – Chair: F. Bernardini, G. Charonis 15:50 – 16:02 Surgical management of superior sulcus hollowing using autologous fat flaps or grafts 16:02 – 16:08 Volume augmentation upper eyell d blepharoplasty, a better look 16:08 – 16:14 Use of plazma energy as an alternative to surgical approaches for periocu	13:00 - 13:10	Brief Introductions C. Eenhorst	
13:35 – 13:45 What YASOPRS is and does – it's raison d'etre and how this can translate to the European setting 13:45 – 13:55 Discussion and Introduction of next YESOPRS leader 14:00 – 15:05 ORBIT I - SESSION – Chair: D. Strianese, G. Rose Plenary Hall/2nd Floor 14:00 – 14:06 The effect of prostaglandin analogue bimatoprost on thyroid associated orbitopathy 14:06 – 14:12 Indications, outcomes, complications and trends in 500 consecutive decompression surgeries by a single surgeon 14:12 – 14:18 Orbital exenteration versus surgical excision in patients with periocular squamous cell carcinoma. A survival analysis study 14:18 – 14:24 Does optic nerve stretch cause dysthyroid optic neuropathy? 14:24 – 14:30 Zirconium-89 labelled rituximab PET-CT in orbital inflammatory disease 14:30 – 14:36 Visual field and orbital computed tomography correlation in compressive optic neuropathy due to thyroid eye disease 14:36 – 14:42 Vertical restrictive strabismus: similar clinical signs, different etiopathogenetic causes 14:42 – 14:48 Real-world use of non-echoplanar diffusion-weighted magnetic resonance imaging for detection, disease monitoring and clinical decision-making in graves' orbitopathy 14:48 – 14:54 The result of intraconal and extraconal fatty decompression 15:05 – 15:25 KEYNOTE LECTURE III – Richard C. Allen, United States Eyelid dynamics: Paying attention to movement, rather than position Introduction by E. Dolgárd Kopp 15:25 – 15:50 Coffee break & Time for Video Presentations and Digital Posters 15:50 – 16:50 AESTHETIC – SESSION – Chair: E. Bernardlini, G. Charonis 15:50 – 16:50 Small incision lower blepharoplasty 5. Elwan 16:02 – 16:02 Surgical management of superior sulcus hollowing using autologous fat flaps or grafts 16:02 – 16:03 Surgical management of superior sulcus hollowing using autologous fat flaps or grafts 16:02 – 16:04 Complemant of superior sulcus hollowing propagate in the surgical approaches for periocular skin problems 16:14 – 16:20 Upen incisional double eyelid plasty with CO2-laser 16:22 – 16	13:10 - 13:25	What I have learnt about the management of Thyroid Eye Disease	M. Mourits
to the European setting 13:45 – 13:55 Discussion and introduction of next YESOPRS leader 14:00 – 14:00 The effect of prostaglandin analogue bimatoprost on thyroid associated orbitopathy 14:00 – 14:01 Indications, outcomes, complications and trends in 500 consecutive decompression surgeries by a single surgeon 14:12 – 14:18 Orbital exenteration versus surgical excision in patients with periocular squamous cell carcinoma. A survival analysis study 14:18 – 14:24 Does optic nerve stretch cause dysthyroid optic neuropathy? 14:18 – 14:23 Dirconium-89 labelled rituximab PET-CT in orbital inflammatory disease 14:30 – 14:30 Visual field and orbital computed tomography correlation in compressive optic neuropathy due to thyroid eye disease 14:30 – 14:42 Vertical restrictive strabismus: similar clinical signs, different etiopathogenetic causes 14:42 – 14:48 Real-world use of non-echoplanar diffusion-weighted magnetic resonance imaging for detection, disease monitoring and clinical decision-making in graves' orbitopathy 14:48 – 14:54 The result of intraconal and extraconal fatty decompression 14:54 – 15:05 Time for Questions & Discussions 15:05 – 15:25 KEYNOTE LECTURE III – Richard C. Allen, United States Eyelid dynamics: Paying attention to movement, rather than position Introduction by E. Dafgdrid Kopp 15:25 – 15:50 Small incision lower blepharoplasty 15:50 – 16:50 AESTHETIC – SESSION – Chair: F. Bernardini, G. Charonis 15:50 – 16:50 Small incision lower blepharoplasty 5. Elwan 16:02 – 16:08 Small incision lower blepharoplasty, a better look 16:09 – 16:14 Use of plazma energy as an alternative to surgical approaches for periocular skin problems 16:14 – 16:20 Surpice test: a new test for detecting lacrimal gland prolapse before upper blepharoplasty 16:20 – 16:26 Complication of injectable hyaluronic acid fillers: 4 clinical cases E. Farah 16:20 – 16:20 Time for Questions & Discussions			•
14:00 – 15:05 ORBIT I – SESSION – Chair: D. Strianese, G. Rose Plenary Hall/2nd Floor 14:00 – 14:01 The effect of prostaglandin analogue bimatoprost on thyroid associated orbitopathy 14:06 – 14:12 Indications, outcomes, complications and trends in 500 consecutive decompression surgeries by a single surgeon 14:12 – 14:18 Orbital exenteration versus surgical excision in patients with periocular squamous cell carcinoma. A survival analysis study 14:18 – 14:24 Does optic nerve stretch cause dysthyroid optic neuropathy? K. Vahdani 21:24 – 14:30 Zirconium-89 labelled rituximab PET-CT in orbital inflammatory disease 14:30 – 14:30 Visual field and orbital computed tomography correlation in compressive optic neuropathy due to thyroid eye disease 14:36 – 14:42 Vertical restrictive strabismus: similar clinical signs, different etiopathogenetic causes 14:42 – 14:48 Real-world use of non-echoplanar diffusion-weighted magnetic resonance imaging for detection, disease monitoring and clinical decision-making in graves' orbitopathy 14:48 – 14:54 The result of intraconal and extraconal fatty decompression Time for Questions & Discussions 14:54 – 15:05 Time for Questions & Discussions 15:05 – 15:25 KEYNOTE LECTURE III – Richard C. Allen, United States Eyelli dynamics: Paying attention to movement, rather than position Introduction by E. Dafgård Kopp Plenary Hall/2nd Floor Library on 1st Floor 15:50 – 16:50 AESTHETIC - SESSION – Chair: F. Bernardini, G. Charonis Plenary Hall/2nd Floor Surgical management of superior sulcus hollowing using autologous fat flaps or grafts Volume augmentation upper eyelid blepharoplasty, a better look S. H. Abdelbaky H. Vüzer for periocular skin problems Volume augmentation upper eyelid blepharoplasty, a better look S. H. Abdelbaky H. Vüzer for periocular skin problems Superior acid fillers: 4 clinical cases E. Farah J. Thulesen 16:26 – 16:32 Open-incisional double eyelid plasty with CO2-laser J. Thulesen J. Thulesen		to the European setting	
14:00 – 14:06 The effect of prostaglandin analogue bimatoprost on thyroid associated orbitopathy 14:06 – 14:12 Indications, outcomes, complications and trends in 500 consecutive decompression surgeries by a single surgeon 14:12 – 14:18 Orbital exenteration versus surgical excision in patients with periocular squamous cell carcinoma.
