João Subtil, MD, PhD

## COURSE PRESENTATION

This course will be organized in a partnership between the Orbit Unit of the CUF Descobertas Hospital (which includes specialists in Ophthalmology, Otorhinolaryngology, Neurosurgery, Maxillofacial Surgery, Plastic and Reconstructive Surgery and Neuroradiology), and the Department of Anatomy of the Nova Medical School/Faculty of Medical Sciences.

It was structured in order to provide a systematic and practical knowledge of the main surgical techniques used in this area. Particular emphasis will be given to the methods and criteria to guide clinical thinking and indication of each technique, as well as practical recommendations to avoid complications.

The course will last one day; the first part will be dedicated to theoretical presentations about the most used surgical approaches. The second period will be fully occupied by the hands-on application of different techniques on cadavers. The tutorial teaching will include a brief review of each procedure, followed by its execution on a cadaver.

The purpose of the course is to provide a systematic and practical knowledge of surgical anatomy of the orbit, as well as to optimize the learning of the most used surgical techniques using cadavers, where all participants can practice the procedures under the guidance of experienced tutors.

## LEARNING OBJECTIVES >> KNOWLEDGE AND SKILLS TO DEVELOP

- >> Understand orbital anatomy from a surgical perspective
- >> Be familiar with the surgical approaches used in the orbit in distinct contexts, their advantages and disadvantages
- >> Plan and execute different surgical techniques used in the approach to the orbital region, taking into account the main anatomical landmarks, risk areas and surgical purpose

## TARGET AUDIENCE

Residents and specialists in Ophthalmology, Otorhinolaryngology, Neurosurgery, Maxillofacial Surgery, Plastic and Reconstructive Surgery and all specialties with a particular interest in Orbit

## ATTENDANCE REQUIREMENTS

100% attendance is mandatory for issuing attendance certificate and CME credits and/or ECTS

## ADMISSION CRITERIA

Academic degree; curriculum vitae

## MAX. ATTENDEES

- >> Ana Duarte, MD
- >> Ana Magriço, MD
- >> Hugo Pereira, MD
- >> João Paulo Farias, MD
- >> João Subtil, MD, PhD
- >> Manuel Caneira, MD, PhD

**CREDITS >> 0,5 ECTS**

**DURATION >> 8 HOURS**

**PRICE >> 750€**

## INCLUSIONS AND EXCLUSIONS IN PRICE

The price published for each course includes teaching fees, space rental, certificate of attendance, and materials used during the course. The price of the course doesn't include hotel accommodation, lunches, and dinners on course days, nor any other items unless specifically mentioned. Prices of courses published by AHED are exempted of VAT. Other items priced by AHED apart from courses may however include VAT.

## APPLICATION, ADMISSION AND REGISTRATION

When applying for a course at AHED – Advanced Health Education, the applicant subjects personal and professional data that will be verified and assessed to check that admission criteria for that specific program are met. Once an application is approved, registration in the course is admitted and will require payment of the price published for the course.

## APPLICATION FEES

Application fees are as follows:

-100 € for courses priced above 1000 €

-50 € for courses priced below equal to 1000 € Application fees are non-refundable.

## COURSE REGISTRATION FEES

The registration stage is considered completed when the total price of the course is received by AHED.

## PAYMENT OPTIONS

Payment options for application and registration include credit card (Visa, MasterCard), wire transfer in Euro, and Multibanco.

## EARLY BIRD

Application fees will be discounted from the course price for registrations completed 90 calendar days before the date of the course.

For additional information, please go to in Terms and Conditions at [ahed.pt](http://ahed.pt)
